CONTRACTING, INC.

Indoor Air Quality Professionals

Celebrating 20 years

Residential, Commercial &
Industrial Buildings

INDOOR AIR QUALITY PROFESSIONALS FAMILY-OWNED, LOCAL COMPANY WE SELF-PERFORM ALL WORK

ASBESTOS ABATEMENT: Asbestos is a naturally occurring mineral that was used in building materials and products for its fire, heat, and sound resistant properties. It has been found to cause serious health issues, including cancer-related illnesses. Asbestos is not banned and is still being used in many building products and commodities today.

The AHERA-trained staff at CRAL Contracting Inc. provides state-of-the-art asbestos abatement for residential, commercial, and industrial buildings.

MOLD REMEDIATION: CRAL Contracting Inc. has the knowledge, tools, and the training required to do a complete investigation and cleanup of all indoor air contamination and mold remediation for all building structures, homes, schools, hotels, hospitals, office buildings, retail facilities, etc.

We are fully certified, trained and bonded for all environmental remediation services.

LEAD REMEDIATION: CRAL Contracting Inc., an EPA Licensed contractor can help you identify, remove, and clean hazardous lead paint from your space. Our properly trained and highly specialized team will use a variety of state-of-the-art methods and technology to return your space to a safe and healthy environment.

Chemical Stripping – Industrial Vacuuming – Wet Scraping – Encapsulation

INDUSTRIAL CLEANING SERVICES: With state-of-the-art equipment and a quick working team, we have the proper solution to all your industrial/commercial cleaning needs.

High Pressure Power Washing – High Pressure Vacuuming – Vac Truck Services – Controlled Blasting for Unwanted Material from Surfaces

PIGEON DROPPINGS: Dry sweeping droppings from pigeons, birds, and rodents into a dustpan can be dangerous. Droppings often carry diseases that are dangerous to humans - histoplasmosis, cryptococcosis, and psittacosis. If the droppings become airborne through dry sweeping, you run the risk of breathing in the particles. Droppings must be cleaned up properly and safely disposed.
