

LEAD REMEDIATION

Residential, Commercial &
Industrial Buildings

INDOOR AIR QUALITY PROFESSIONALS
FAMILY-OWNED, LOCAL COMPANY
WE SELF-PERFORM ALL WORK

• CHEMICAL STRIPPING • INDUSTRIAL VACUUMING • WET SCRAPING • ENCAPSULATION

ARE you working or living in a building that has significant years to it? It is possible that lead paint was used in the construction and maintenance of the building or home. Dust from lead paint is the most common way people are exposed to lead. Plus, our bodies can absorb lead dust from the soil and paint chips. Lead dust is often invisible.

CRAL Contracting Inc., an EPA Licensed contractor can help you identify, remove, and clean hazardous lead paint from your space making it safe again. Our properly trained and highly specialized team will use a variety of state-of-the-art methods and technology to return your space to a safe and healthy environment.

We are fully certified, trained and bonded for all environmental remediation services.
